Stormwater Technical Team –

As discussed at the last meeting, here is a high level summary of action items and highlights:

- ε We agreed the next meeting should be Dec. 19 from 11 to 1 pm. This would be in person, in Portland, since we will want to project the data on the wall. I will set up a WebEx meeting for those who may need to call in. I will confirm the location soon. **Kristine** – If this time does not work for you, we also set up an alternate time for Dec. 20 (same time of day). Let me know which one works best for you.
- ε Sulzer – The group agreed that we would proceed with stormwater sampling but NOT sediment traps at Sulzer, due to deployment logistics. Anchor will work on a more detailed description of how the stormwater will be collected and flow will be monitored.
- ε New Hwy 30 Sample – It was agreed that the sample taken on Oct. 16<sup>th</sup> at the new Hwy 30 site could be used as a sample, even though sample representing about 4% of the flow from the middle of the storm was not collected.
- ε Load Calculation Methods – Methods for handling replicates and non-detects were discussed and Integral/Anchor will prepare data following these methods for use at the next call. The next call will work on the next steps in the loading calculation based on these data. It was agreed that this data analysis would concentrate on 4 PCB congeners, As, Pb, 2 PAHs, and TSS for the purposes of deriving methods.
- ε The Port is going to prepare on a Field Sampling Report similar to the one being prepared by the LWG for the spring sampling at the non-Port stations.
- ε Anchor to look for a statistician to attend the next meeting.
- ε Carl was going to look into the groups pace relative to the overall project schedule to make sure we are moving fast enough.

Let me know if I missed anything critical.

Thanks.

Carl

## Stormwater Technical Team –

At our last meeting, we decided to have our next in person meeting on Nov. 27<sup>th</sup> from 12:30 to 4 pm. I have secured Room 1904 at the offices of Schwabe, Williamson, Wyatt, which is at 1211 SW Fifth Avenue. We will continue our discussions of stormwater loading calculation methods.

In case someone cannot make it, the following call in number is also available:

Non Responsive

Thanks.

Carl
